AI Engineer Core Track: LLM Engineering, RAG, QLORA, Agents

Scientific Computing with Python

Samuel Adebodun

Platform & Cloud Engineer | Azure, Terraform, Kubernetes | Helping Teams Ship Faster with Secure, Automated Infrastructure
Nigeria

Summary

I'm a DevOps, Cloud, and Platform Engineer who enjoys building secure, reliable, and scalable infrastructure that helps engineering teams move faster without breaking things. I primarily work with Azure, using tools such as Terraform/Bicep, Ansible, Docker, Kubernetes, and CI/CD pipelines to automate environments, simplify releases, and keep systems stable.

I've worked across meteorology, fintech, and training environments, supporting mission-critical systems where uptime, data integrity, and security really matter. My experience spans identity and access management, infrastructure-as-code, monitoring and observability, and incident response, as well as hands-on system administration and IT support.

I'm Microsoft certified as an Azure Solutions Architect Expert and DevOps Engineer Expert, and I've applied these skills in projects like my Azure-based Cloud Resume Challenge, where I used serverless, edge, and IaC patterns to deliver a highly available, low-cost personal platform. I enjoy taking complex infrastructure problems, breaking them down, and designing practical solutions that balance reliability, cost, and delivery speed.

Currently, I'm focused on DevOps / Cloud / Platform Engineering work, where I own CI/CD, infrastructure-as-code, and cloud security across Azure and multi-cloud environments, and collaborate closely with developers, security, and product teams.

Experience

Conclase Academy

DevOps Engineer

May 2025 - October 2025 (6 months)

- Built and maintained CI/CD pipelines with GitHub Actions, reducing deployment time from 10 minutes to 3 minutes.

- Developed and managed containerised applications using Docker, ensuring consistent releases to Kubernetes.
- Implemented monitoring and logging for training environments, improving issue diagnosis for instructors and learners.
- Automated environment provisioning with Terraform and Ansible, decreasing manual setup work by approximately 25%.

Stabim Innovative Limited

Information Technology Support Engineer

November 2022 - October 2025 (3 years)

FCT, Nigeria

- Provided technical support for fintech platforms, ensuring seamless operation of digital payment systems.
- Resolved payment processing issues and transaction disputes, enhancing customer satisfaction and trust.
- Collaborated with cross-functional teams to ensure compliance with security and regulatory standards.

Nigerian Meteorological Agency (NIMET)

System Administrator

November 2023 - April 2025 (1 year 6 months)

Federal Capital Territory, Nigeria

- Maintained 24/7 operational integrity of critical weather data processing systems, ensuring accurate forecasting during severe weather events.
- Managed extensive meteorological databases, implementing robust backup procedures that improved data integrity by 30%.
- Configured and supported network infrastructure, facilitating reliable data transmission from nationwide weather stations to central processing facilities.

Nigerian Meteorological Agency (NIMET)

Network Administrator

December 2021 - April 2022 (5 months)

- Maintained critical data transmission systems for real-time weather monitoring and forecasting.
- Configured and managed routers to ensure seamless connectivity between automated weather stations and processing facilities.
- Enhanced network security protocols, contributing to 24/7 operational reliability for public safety.
- Troubleshoot mission-critical systems, minimizing downtime and ensuring accurate weather data flow.

Education

Miva Open University

Master of Technology - MTech, Information Technology · (September 2025 - September 2026)

Conclase Academy

DevOps · (January 2025 - July 2025)

University of Abuja

Bachelor's degree, Computer Science · (2019 - 2023)

Cisco Networking Academy
